Setlist Manager
Official User Manual
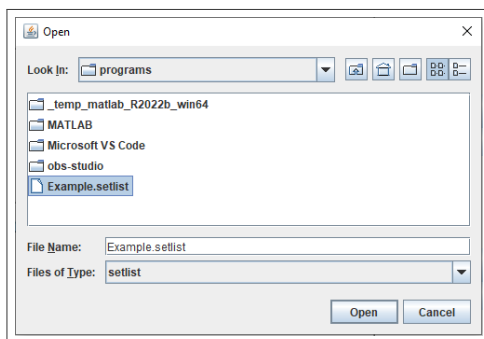

Contents

1 Introduction

Setlist Manager allows musicians to generate semi-random setlists for live music performance.

2 Catalog Management

Select the Catalog tab `Catalog` at the top of the window to manage your song catalog.
The song catalog is arranged alphabetically by composer, then title.

2.1 Open a Song Catalog

1. In the Catalog tab, click the Open Catalog button `Open Catalog` located at the right side of the window.

2. Use the file browser to locate a song catalog file.

Song catalogs use a .setlist file extension.

2.2 Add/Edit a Song

1. Click the Edit button next to an existing song in your catalog, or Click the Add button on the right side of the window.

This will bring up a window where you will enter the song's data.

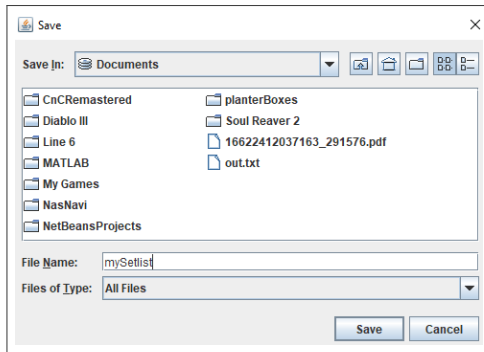

2. Enter the song title

3. Enter the composer

4. Enter the song's key

5. Enter the song's genre.
   For songs that fit multiple genres, use a comma to in between each genre.

6. Enter the length of the song in seconds

7. Enter the song's tempo in beats-per-minute(BPM)

8. Enter an introduction time in seconds. The introduction time can be used to tell a story, explain a song's meaning, or introduce members of the band.

9. The Archive checkbox prevents a song from being added to a setlist, but it will still be visible in the song catalog.
2.3 Save/Export the Song Catalog

1. Click the Export Catalog button located at the right side of the window.

2. Use the file browser to select a location and name for your song catalog file.
Note: Any unsaved changes to the catalog will be lost when the program exits

3 Setlist Creation

Select the Setlist tab Setlist at the top of the window to create setlists.

3.1 Configure Setlist Length and Breaks

1. In the Setlist tab, click the Setlist Settings button Setlist Settings to open the Setlist Settings window.

2. Enter the Set Length in seconds.

3. Enter the length of each break in seconds.

4. Enter the number of breaks for the set.
   Note: Breaks are spaced evenly thoughout the set.
5. Click OK to save the settings.

3.2 Filter Songs

3.2.1 Filter Individual Songs

1. Locate the song in the Catalog tab, and click the Edit button.

The Edit Song window will appear.

2. Click the Archive checkbox Archive: ☑ so the check mark appears.

3. Click OK

The song will not be added to setlists until the check is removed.

3.2.2 Filter by Genre

1. In the Setlist tab, click the Setlist Settings button [Setlist Settings] to open the Setlist Settings window.

2. In the Genre field, enter any genre you wish to include in your setlist.

3. Click OK

Any song that is not categorized in an included genre will not be added to a setlist.
When the Genre field in Seltlist Settings is black, all song genres will be available for a setlist.

3.3 Generate Setlist
Select the Generate Setlist button to create a new setlist based on your settings.
You may see a warning, and generate an incomplete setlist if there are not enough songs in the catalog.

3.4 Export/Share a Setlist
